

# INDIAN JOURNAL OF WEED SCIENCE

Vol. 42, No. 1 & 2

January-June, 2010

## CONTENTS

Title	Page
Residues of Sulfosulfuron, Mesosulfuron+Iodosulfuron and Pinoxaden in Soil, Wheat and Successive Crops – <i>Mandeep Kaur Saini, U. S. Walia and S. K. Randhawa</i>	1-8
Long-Term Effect of Tillage and Weed Control on Weed Dynamics, Soil Properties and Yield of Wheat in Rice-Wheat System – <i>J. S. Mishra, V. P. Singh and Namrata Jain</i>	9-13
Effect of Herbicides and Nutrient Management on Weed Flora, Nutrient Uptake and Yield of Wheat ( <i>Triticum aestivum</i> ) under Irrigated Conditions – <i>A. K. Khokhar and V. Nepalia</i>	14-18
Effect of Irrigation Levels and Chlorsulfuron Doses on Productivity and Water Use of Wheat – <i>Kanwar Singh, R. K. Malik, S. K. Yadav, Ashok Yadav and Sher Singh</i>	19-22
Weed Management in Rice-Wheat Cropping System under Conservation Tillage – <i>S. N. Sharma and Rajesh Kumar Singh</i>	23-29
Competitive Ability of Rice Genotypes against Weeds in Direct Seeding Production System – <i>U. S. Walia, G. Gill, S. S. Walia and Amandeep S. Sidhu</i>	30-34
Effect of Seeding Depth and Flooding Duration on the Emergence of Some Rainy Season Weeds – <i>Samunder Singh</i>	35-43
Interaction Effect of Water Temperature for Spraying Clodinafop Formulations on <i>Phalaris minor</i> biotypes – <i>Samunder Singh, S. S. Punia and R. S. Malik</i>	44-51
Effect of Pinoxaden on the Seedling Growth and Chlorophyll Development of the Fenoxaprop-P-Ethyl Susceptible and Resistant Biotypes of <i>P. minor</i> and Wheat – <i>Rupa S. Dhawan, P. Bhaskar and Sunaina Chawla</i>	52-55
Effect of Irrigation and Weed Management on Lentil ( <i>Lens culinaris</i> Medic. L.) under Different Planting Techniques – <i>Manjunath, Rakesh Kumar, Satish Kumar and S. K. Thakral</i>	56-59
Evaluation of Different Mulches for Weed Management in Pea ( <i>Pisum sativum</i> L.) – <i>Moolchand Singh</i>	60-62
Weed Flora of Potato ( <i>Solanum tuberosum</i> ) and their Management in the Nilgiris – <i>K. Manorama, A. Balasubramanian and G. Ravichandran</i>	63-66
Evaluation of Different Weed Management Practices in Potato ( <i>Solanum tuberosum</i> L.) – <i>Moolchand Singh</i>	67-72

Comparative Growth Analysis of Parthenium and Other Weeds in Sorghum Ecosystem – <i>Besufekad Tadesse, T. K. Das and N. T. Yaduraju</i>	73-76
Analysis of Herbicide Residues in Onion Bulbs and Soil under Different Planting Patterns and Straw Management Techniques – <i>Mandeep Kaur Saini, S. K. Randhawa and U. S. Walia</i>	77-81
Allelopathic Potential of Sunflower ( <i>Helianthus annuus</i> ) against Seed Germination in Wild Mustard ( <i>Sinapis arvensis</i> ) and Foxtail ( <i>Setaria viridis</i> ) – <i>Zoheir Y. Ashrafi, Aptin Rahnvard and S. Sadeghi</i>	82-87
Effect of Different Temperature Regimes on Persistence of Imazethapyr and Trifluralin – <i>Kuldeep Singh, Archana Kumari, Ran Singh Rinwa and Samunder Singh</i>	88-94
<b>SHORT COMMUNICATIONS</b>	
Bioefficacy of Pyroxsulam (XDE-742) for Weed Control in Wheat ( <i>Triticum aestivum</i> L.) – <i>V. Pratap Singh, V. C. Dhyani, S. P. Singh, Abnish Kumar, M. K. Singh and Neeta Tripathi</i>	95-97
Bioefficacy of Azimsulfuron against Sedges in Direct Seeded Rice – <i>V. Pratap Singh, S. P. Singh, V. C. Dhyani, N. Tripathi, A. Kumar and M. K. Singh</i>	98-101
Bioassay of Pendimethalin at Different Moisture Levels in Wheat for Controlling <i>Polygonum</i> – <i>P. K. Mukherjee, Aditya Pandit and Swapan Kumar Maity</i>	102-103
Influence of Weed Control on Quality and Economics of Strawberry ( <i>Fragaria x ananassa</i> Duch.) cv. Chandler – <i>Kirti Jamwal, V. K. Wali, Dileep Kachroo and B. R. Bazaya</i>	104-106
Production Potential and Economics of Integrated Weed Control Measures in Ginger ( <i>Zingiber officinale</i> Rosc.) cv. Nadia – <i>L. Barooah, S. Saikia and D. J. Rajkhowa</i>	107-110
Suitable Method for Weed Management in Cumin ( <i>Cuminum cyminum</i> L.) – <i>Anupriya Yadav, J. C. Patel, R. S. Mehta and Meena Taramani</i>	111-113
Effect of Weed Management on Weeds, Nutrient Uptake, Nodulation, Growth and Yield of Summer Mungbean ( <i>Vigna radiata</i> ) – <i>Gaganpreet Kaur, H. S. Brar and Guriqbal Singh</i>	114-119
Evaluation of Pinoxaden in Combination with 2, 4-D against Complex Weed Flora in Barley – <i>Sunil Kumar, M. S. Bhattoo, S. S. Punia and Samunder Singh</i>	120-122

---

## Cover Photos

Top left : *Ammania baccifera* plants with 0, 4, 8, 16, 32 and 64 d flooding treatments, 40 DAS (2006) and inset photo with 0 to 64 d flooding on emergence and growth, 75 DAS (2007). Left bottom : *Cyperus difformis* with 4, 8, 16, 32 and 64 d flooding treatments, 40 DAS (2006) and inset without (L) and with (R) 8 d flooding on emergence and growth, 25 DAS (2007). Top right and bottom : *Scirpus roylei* and *Cyperus iria* plants, respectively with 0 to 64 d flooding, 75 DAS (2007). For more details, read article on page 35-43.
